EDUCATION

Arizona State University

Bachelor of Science in Computer Science, GPA: 3.8/4.0

Tempe, AZ

Aug. 2024 – Expected May 2028

EXPERIENCE

Software Developer Intern

AVEVA

May 2026 – Present

Scottsdale, AZ

- Developed backend features for a Knowledge Graph GraphQL service using C# and .NET Core.
- Built and enhanced APIs and SDKs supporting cloud-based industrial software applications.
- Enhanced GraphQL APIs through feature development, bug fixes, and reliability improvements.
- Worked with GraphQL schemas, resolvers, and backend services to support scalable backend data access.
- Optimized data loader request fanning to reduce service overhead and improve efficiency.
- Built and deployed containerized services using Docker and Kubernetes.

PROJECTS

F1 Qualifying Lap Time Predictor | Python, scikit-learn, Pandas, Matplotlib

Sep. 2025 – Oct. 2025

- Built a Random Forest model to predict Formula 1 qualifying lap times from historical race data.
- Engineered features and tuned hyperparameters with GridSearchCV, achieving an R^2 of 0.94.
- Visualized feature importance and model performance using Matplotlib.

Vintage Storefront Website | React, TypeScript, AWS, Stripe, Vercel

Jun. 2025 – Present

- Built a full-stack e-commerce platform with authentication, inventory, and Stripe payments.
- Designed scalable AWS backend infrastructure and deployed the frontend with Vercel.
- Developed an admin dashboard for inventory, orders, and customer management.
- Generated over \$1,000 in sales while supporting hundreds of monthly visitors.

Heimdall AI Voice Assistant | Python, Whisper.cpp, YOLOv8, Ollama, AWS

Jul. 2025

- Built an AI voice assistant enabling visually impaired users to navigate desktop interfaces through natural voice commands.
- Integrated local speech-to-text, OCR, and UI element detection to achieve real-time screen understanding with sub-second latency.
- Architected offline-first workflows with cloud-backed accessibility telemetry using AWS S3 and DynamoDB.

ReThread Chrome Extension | JavaScript, Chrome APIs, Gemini API

Mar. 2025

- Built a Chrome extension that recommends secondhand alternatives on fast-fashion websites.
- Implemented Gemini Vision image matching and keyword-based product recommendations.
- Won 2nd place at the DevLabs Hackathon among 200+ participants.

VisionAssist Smart Glasses | Python, Raspberry Pi, GPIO

Sep. 2024 – Dec. 2024

- Built wearable smart glasses for real-time obstacle detection using haptic feedback.
- Integrated Raspberry Pi, ultrasonic, and light sensors for environmental awareness.
- Achieved 95% obstacle detection accuracy with sub-200 ms response time.

SKILLS

Languages: C#, Java, Python, C/C++, SQL, JavaScript, TypeScript, Rust

Frameworks & Technologies: .NET Core, React, Vue.js, GraphQL, REST APIs

Cloud & DevOps: AWS, Docker, Kubernetes, Git, Azure DevOps

Interests: Basketball, Cars, Fashion, Music, Sim Racing
